KJ-940™ KJ-950™ DESIGNER-MATE™

Designed with a look that projects strength and durability, both the KJ-940™ and KJ-950™ are designed with eye catching style that will increase sales. With built-in standard features, you will like the ease of low or no maintenance.

The Slide-in™ insert with built in coin box is a favorite with rack repair personnel in extremely cold weather. Mounted on a wide base, these units are stable. At the newspapers discretion, for special locations, the base can be bolted down or filled with sand. Chaining is necessary for security reasons only. These racks can be fitted with a Power door closer™ for customer safety.

All K-Jack newsracks are designed to operate with a standard K-Jack mechanical snap-out™ mechanism or our electronic Comp-U-Mech™ mechanism.

▼ STANDARD FEATURES AND EQUIPMENT
